

THREAD 1 · SERIES 01

SCREW CATALOGUE

RANGE 21 product lines — self-tapping, wood, chipboard, drywall,
self-drilling, machine screws and carriage bolts

MATERIAL Mild steel · Stainless steel

SIZES 2g to 14g · M3 to M5 · lengths 4.5 to 150 mm

ABOUT US

We're a Brisbane-based, Australian-owned hardware company here to add value to the businesses we supply. We work on the supply chain itself — how hardware is specified, made, shipped, and delivered — so the trade gets a better standard of product and a better standard of service.

Hard Hardware was founded in Brisbane in March 2026. We run our own production program: we write the specifications against Australian standards, and every line is built to those specifications and to the quality standard we set. We inspect each consignment before it ships, clear it through the Port of Brisbane, and sell it under our own name with full Australian compliance labelling on every pack.

Owning that chain end to end means we control what goes in the box. Material grade, thread form, plating, head and drive, pack count — each one is set by us in writing before production starts, then checked twice: once at the factory before the consignment is released, and again on arrival in Brisbane before stock goes out to customers. Where a line does not meet the specification, it does not get sold.

That responsibility does not stop at the dock. If something is wrong — a count, a finish, a size that does not fit the job — you deal with us directly, not with a chain of suppliers pointing at each other. We answer for it and we fix it. Give us a try and you'll find what has been missing in service.

WHY CHOOSE HARD HARDWARE

Six things we hold ourselves to on every order, whether it is a single carton or a container.

01 Pricing set at the source

We operate our own production facility and sell direct, so the price you pay reflects what the product costs to make and land. Trade tiers are volume-based and published, so a small builder and a large reseller both know where they stand.

02 Quality you can check

Quality starts before production: we supply the raw material ourselves, so the steel every line is made from is our choice, not a substitution. From there each line is built to a written specification — material grade, thread form, hardness, plating thickness, head and drive. Consignments are inspected before dispatch and checked again on arrival in Brisbane. If a batch misses the specification, it does not go on the shelf.

03 Australian compliance built in

Country-of-origin labelling, importer identification, HS classification and true product descriptions on every pack, with Australian Consumer Law compliance across the range. Nothing grey, nothing unlabelled, nothing you have to explain to a client.

04 Pack sizes made for the job

Packs run from 50 to 1,000 pieces depending on the line, so a fit-out crew can buy by the carton and a homeowner can buy a tub without paying for a pallet. We stock what the job site actually uses rather than a catalogue of dead sizes.

05 One point of responsibility

Specification, production, inspection, freight, customs and delivery sit with us. When something needs sorting you speak to the people who own the decision, and it gets resolved on our side rather than passed along a chain.

06 A range that grows with demand

This catalogue covers screws, but it is one part of what we carry — builders hardware, door and cabinet fittings, kitchen hardware and more sit under the same roof, so it is worth asking before you buy elsewhere. Custom and project sourcing is available on volume: send the specification and we will quote it, sample it, and produce it.

ORDER CODES

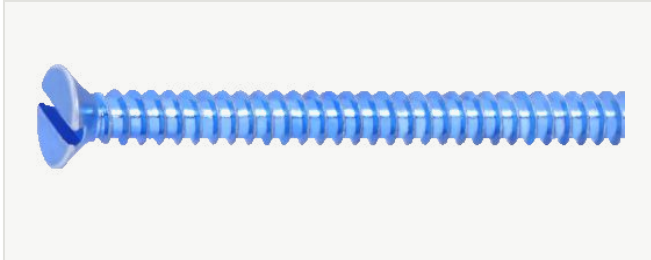

Every line carries a Hard Hardware SKU in the format HH-[category]-[product]-[finish]. Order by SKU and size; pack quantities are stated on each product page.

MS CSK SLOTTED SELF TAPPING SCREW

HH-CSK-0001-ZN

COUNTERSUNK, SLOTTED

PIECES PER PACKET

Mild steel sheet metal screws with sharp tips and threads for easy penetration. The quality and strength ensure that penetration is easy and the screw creates its own thread inside the material. Choose a proper sized drill hole and screw driver. Used where the final finishing surface is flat and the head penetrates into the surface.

APPLICATION

Sheet metal work

Wooden furniture

Doors & window hinge fittings

Electrical & electronic item fittings

MS PHILLIPS BUGLE HEAD DRYWALL SCREW

HH-FAS-0006-BK BUGLE HEAD, PHILLIPS PIECES PER PACKET

Mild steel sheet metal screws with Phillips bugle head, sharp tips and threads for easy penetration. Used with power tools; choose a proper sized drill hole and screw driver.

APPLICATION
POP sheet fittings in ceilings and walls
Aluminium sections (door & window fittings)

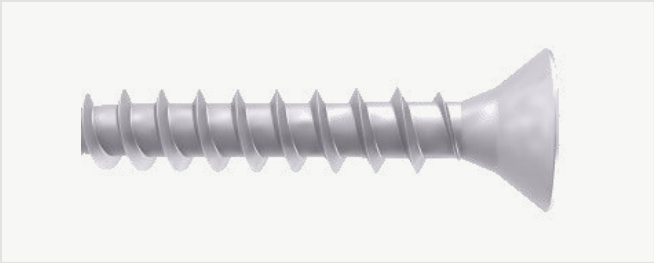

Available in three finishes — blackening (HH-FAS-0006-BK), nickel (HH-FAS-0006-SL) and antique (HH-FAS-0006-AQ).
Sizes and pack quantities are common to all three.

MS CSK PHILLIPS SELF DRILLING SCREW

HH-CSK-0010-ZN COUNTERSUNK, PHILLIPS, DRILL POINT PIECES PER PACKET

Special steel screws that drill their own hole. The drill point works like the point of a drill bit: it drills the hole and forms the mating thread in one operation. Used with power tools.

APPLICATION

- Roofing sheet fittings
- Joining two objects of sheet metal
- Aluminium section work

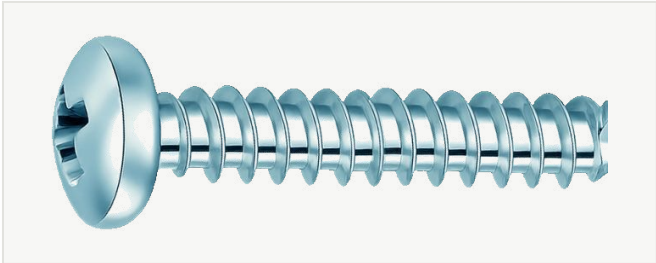

Gauge shown with shank diameter: 6g = 3.5 mm, 7g = 3.9 mm, 8g = 4.2 mm. All lengths in mm.

MS PAN HEAD SELF DRILLING SCREW

HH-PAN-0019-ZN PAN HEAD, POZIDRIV, DRILL POINT PIECES PER PACKET

Mild steel screws for quick, secure fastening into metal without pre-drilling. The smooth rounded pan head gives a neat finish and even pressure distribution, and the sharp self drilling point makes for fast penetration and easy installation.

APPLICATION

- Metal to metal fastening
- Sheet metal assemblies
- Electrical fittings

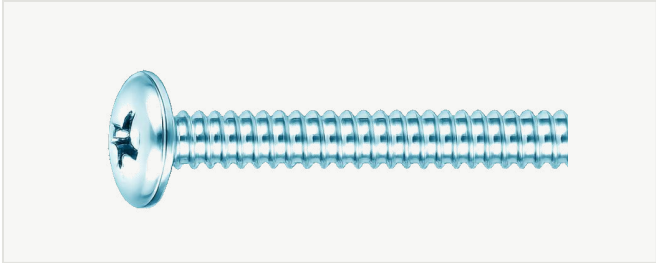

30 packets per carton.

MS TRUSS HEAD SELF DRILLING SCREW

HH-FAS-0020-ZN TRUSS HEAD, POZIDRIV, DRILL POINT PIECES PER PACKET

A low-profile wide truss head spreads load across the fixing and gives a clean finished appearance, while the sharp self drilling point penetrates metal without pre-drilling. Suited to fabrication, electrical panels, roofing accessories and industrial assemblies.

APPLICATION

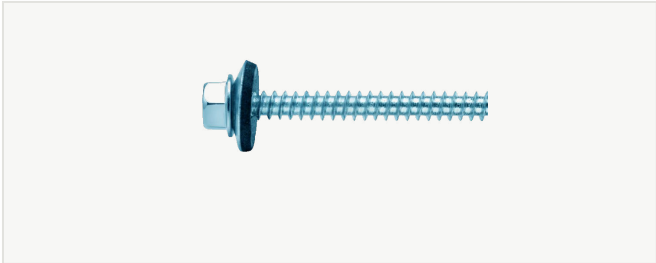

- Fabrication
- Electrical panels
- Roofing accessories
- Industrial assemblies

30 packets per carton.

MS HEX HEAD SELF DRILLING SCREW

HH-FAS-0021-ZN HEX HEAD WITH WASHER, DRILL POINT PIECES PER PACKET

Designed for fast, secure fastening into metal without pre-drilling. The strong hex head takes high torque tightening and the sharp self drilling point penetrates quickly, giving reliable performance in metal to metal applications.

APPLICATION

- Roofing and cladding
- Metal to metal fastening
- Structural sheet fixing

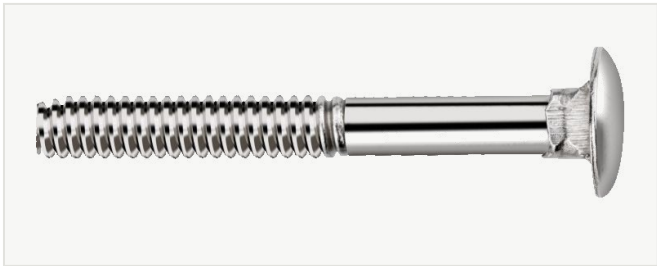

30 packets per carton.

MS CARRIAGE BOLT WITH NUT & WASHER

HH-FAS-0022-ZN DOMED HEAD, SQUARE NECK SOLD BY WEIGHT

Mild steel bolt with a smooth round head and a square neck that locks firmly into place to prevent rotation during tightening. Supplied with nut and washer for strong, reliable fastening with a clean finished appearance.

- APPLICATION
- Wood to metal connections
 - Furniture
 - Construction
 - Fencing
 - General engineering

Supplied in 1 kg packets, 30 packets per carton. Nut and washer included.
